

2sms Voice Cloud

Cost effective, collaborative communication cutting phone costs by up to 50%

Sound familiar? You are growing, yet growth brings more sophisticated requirements for your phone system. More users, some remote, some mobile, some on the road.

What if you could simply replace your existing phone system with a cost effective communication platform, payable on a per-user subscription basis?

Cost Effective: As a cloud based solution, costs are halved by:

- No upfront infrastructure or investment costs
- No landline / ISDN or hardware rental fees
- No phone system hardware to maintain and power

Collaborative: No matter how virtual you are, colleagues still need to instantaneously meet, edit and agree on actions. 2SMS Voice Cloud supports this by:

- Click-to-dial
- Presence awareness
- Conference calling
- Screen sharing
- Meeting transcriptions
- Geo-location mapping

Case study:

The product saved 2sms money; that is why we are selling the service.

As 2sms grew, we found that one of our highest overheads were our phone costs. In installing 2sms Voice, monthly overheads for line rental and call charges dropped from £1,000 pcm to £300 and we are still able to continue using our familiar Avaya IP Office equipment.

"The cost savings were so significant for us, we decided to sell the product!" says Tim King, CEO of 2sms. "2sms Voice Cloud was born."

2sms Voice Cloud

Communication: Communicate via any device in any location,

- SMS
- Instant message
- Skype or landline / mobile call
- Email
- Manage contacts and calendars
- Voicemail transcription
- Call forwarding
- Remote access
- 24 x 7 support
- 9 languages

Seamless: As with most intuitive Cloud solutions, there is no need to migrate and launch the new system. No downtime for system launch or training.

- Continue with your existing phone numbers
- Utilise existing hardware such as VOIP headsets
- Continue with existing devices: handsets, tablets, laptops, smartphones
- Continue with familiar interfaces: Skype

Pricing:

- £10 per user per month
- Inter-company calls: free, independent of geographical location
- External calls: low rates with UK mobiles at only 2.8p per minute

This is a comprehensive solution for any corporate looking to find cost savings while enhancing employee productivity with leading collaboration tools delivered via one communication platform.

We did it at 2sms, we loved it, we saved money, and now we sell it.
